

# An Optimum Solution is Proposed Interweaving a Variety of Professional Specialties. The Hibino Group, an Ever-Evolving Group for the Creation of “Emotions”.

With the purpose of “Creating Emotions Around the World with Sounds and Visuals,” the Hibino Group continues to leave a footprint befitting of a pioneer in the fields of acoustics, images, music and live events. What is most important to the Hibino Group? The Hibino Group firmly believes that there is only one way for it to become valuable to its customers. This can be accomplished by adding an “analog” value that can be created only by humans and by adding the state-of-the-art technology and know-how in the digital field as a “premise” to “operational technology” to identify and coordinate the infinitesimal quality of sound, hues and other elements that cannot be processed digitally.

This will become complete when craftsmen’s skills acquired through experience and emotions are also added.

As digitalization accelerates as at present, the professional resources of the Hibino Group in acoustics, images and lighting are creating a higher set of values and the stages awaiting these professional resources are spreading from Japan to the entire world.

With the intention of further enhancing its “total solution” function to propose integrated and comprehensive solutions to meet the ever-diversifying requirements of its customers, the Hibino Group is proactively undertaking various measures to reinforce the overall competence of the Group.

## Sales and Installation Business

### hibino marketing

- **Hibino Corporation hibino marketing Div.**  
Businesses related to the sales of professional audio equipment. Design, installation and maintenance of systems
- **Hibino Intersound Corporation**  
Sales of professional audio and video equipment. Design, installation and maintenance of related systems
- **ELECTORI CO., LTD.**  
Sales of professional audio, video and control equipment. Design, installation and maintenance of related systems. Sales of consumer audio equipment
- **TECHNO HOUSE INC.**  
Sales of professional video and audio equipment. Design, installation and maintenance of related systems
- **Hibino Lighting Inc.**  
Sales of lighting equipment for business use. Design, installation and maintenance of related systems

### hibino chromatek group

- **Hibino Corporation hibino chromatek Div.**  
Development, manufacture and sales of LED displays and systems
- **NGC Corporation**  
Sales, system design, installation, and maintenance of professional video equipment
- **Cerevo Inc.**  
Development, manufacturing, and sales of IoT-related products; contracted development of other companies’ products
- **Hibino Asia Pacific Limited**  
Sales of LED displays and peripheral equipment

## Architectural Acoustics Installation Business

- **NIPPON ENVIRONMENT AMENITY CO., LTD.**  
Design and installation of architectural acoustics. Development, manufacture and sales of acoustic products. Consulting on Sound and Vibration, surveys and measurement
- **Nihon Onkyo Engineering Co., Ltd.**  
Design and installation of architectural acoustics. Development, manufacture and sales of acoustic products. Consulting on Sound and Vibration, surveys and measurement
- **SANOH CORPORATION**  
Design and Installation of Industrial noise countermeasures. Development, manufacture and sales of products for industrial noise control
- **NOE Asia Pacific Company Limited**  
Design and installation of architectural acoustics. Development, manufacture and sales of acoustic products. Consulting on Sound and Vibration, surveys and measurement

### Other

- **Ofix Co., Ltd.**  
Sales of office furniture. Design, installation and interior finishing work of office environments.
- **Hibino Entertainment Corporation**  
Managing entertainment business overall at hibino group including operation of live music club
- **Eightythree Corporation**  
Operation of “Kennedy House Ginza,” a live house

### hibino engineering

- **Hibino Spacetech Corporation**  
Sales of professional audio and video equipment. Design, installation and maintenance of professional audio and video systems
- **Hibino Imagineering Corporation**  
Sales of professional audio and video equipment to movie theaters and halls. Design, installation and maintenance of related systems

### Sama Sound group

- **Sama Sound Inc.** Sales of professional and consumer audio equipment
- **Sama D&I Co., Ltd.** Sales of professional and consumer audio equipment
- **Sama CDS Inc.** Sales of professional audio equipment. Design, installation and maintenance of related systems

## Concert and Event Services Business

### hibino sound group

- **Hibino Corporation hibino sound Div.**  
Planning, rental and operation of acoustic systems for concerts and events. Live event recording

### hibino visual group

- **Hibino Corporation hibino visual Div.**  
Planning, rental and operation of video systems for concerts and events
- **Hibino Media Technical Corporation**  
Planning, rental and operation of video and audio systems for events. Planning and operations of and consultancy on events. Dispatch of operators and engineers related to audio and video equipment and systems
- **Hibino Sigma Rise Corporation**  
Planning, rental and operation of video and audio systems for events
- **CH Holdings Inc.**  
Management and supervision of subsidiaries involved in video production services
- **ellroy Inc.** Video production
- **SAZABI Inc.** CG/VFX production
- **Delancy Inc.** Video production
- **RECO inc.** Video production
- **Torie Inc.** Video editing
- **CHAMELEON Inc.** xR/Exhibition video production
- **BOLDTYPE Inc.** Video production
- **massive inc.** Video production
- **Canaan Inc.** Film production
- **Hibino USA, Inc.**  
Management and supervision of US subsidiaries
- **H&X Technologies, Inc.**  
Planning, rental and operation of video and audio systems for events
- **Hibino Europe B.V.**  
Management and supervision of European subsidiaries

## Proposing Optimal Products and Solutions Meeting the Needs of Audio and Video Systems Responding to More Diverse and High Quality of the Day.

Since its establishment in 1985, Hibino Intersound has constantly proposed optimal solutions tailored to customer needs, fully utilizing its versatile live acoustic technology and audio and video system integration technology developed as a Hibino Group company. Hibino Intersound has won the satisfaction of customers of facilities in many business segments including large halls, live event venues and music-related facilities, meeting rooms for corporate customers and commercial facilities.

## **HIBINO** Hibino Intersound Corporation <https://www.hibino-intersound.co.jp/>

### Total Systems for Sounds and Images Proposed

The scenes for the utilization of total systems that integrate sounds and images are increasingly expanding to various segments of society. Responding to these needs of the times, Hibino Intersound Corporation meets the requirements of its customers that are becoming more diverse and higher quality, fully utilizing its in-depth expertise, know-how and specialist knowledge of the Hibino Group in the audio and video field.

### Versatile Lineup of Equipment of Quality Brands

Since its establishment, Hibino Intersound has been importing and selling audio and video equipment that is enjoying a high reputation globally for high reliability. Hibino Intersound selects equipment manufacturers deserve a partnership. The selection is made from the standpoint of innovation, technological power, and future potential. The items manufactured by these manufacturers ranging from equipment for business such as large mixing consoles and intercom systems to consumer products that are rich in variation. These products are sold through the network of Hibino Intersound hand in hand with its high-quality services.

Creating impressive time and space to rouse emotion in the human heart, selecting "the first-class high quality products in the world" with stern eye.

Electori Co., Ltd. has reached the market for the audio/visual equipment for commercial and professional, and video and information equipment since established.

"The first-class high quality product in the world" selected from various diversity of perspectives with sound quality, durability, originality and spirit of innovation has created great impression becoming a core of the specification design for facility and AV room such as school, government and public office, and entertainment space, etc.

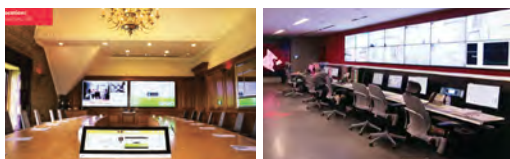

## Professional Division

Offer the key product to create space producing productive communication.

Starting with the top brand "AMX" of control equipment for professional use connecting audio and video equipment and every ICT(Information and Communication Technology) equipments seamlessly, delivering the core product of audio and visual system design in large-sized facility, such as school and government and public office, etc.

### Business Lines

- Import and sale of musical instrument related equipment
- Import and sale of amusement installation equipment
- Import, sale and design of A/V control system

### Principal Brands Handled

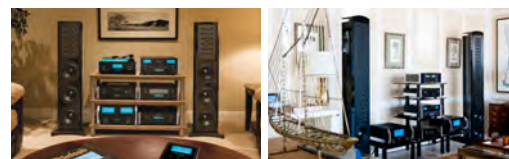

## Consumer Division

The highly evaluated nature/essence of the only the first-class product. Deliver the delight and pleasantness of audio to the music lovers.

Presenting a large lineup of equipment extensively to fulfill the expectation of high quality sound to the audiophiles, revolving "McIntosh" globally and highly evaluated as a leading brand of the high-end audio for consumers.

### Business Lines

- Import and sale of high-end audio equipment for consumer
- Consulting of high-end audio

### Principal Brands Handled

**Company Profile.** Corporate Name: ELECTORI CO., LTD., Head Office Address: 2-7-70 Kaigan, Minato-ku, Tokyo 105-0022 Japan, Established: Dec. 23 1964, Representative: Yoshifumi Yasui, President, Business Lines: Import and selling of audio equipment for consumers and professionals and video and information equipment

The distributor/system integrator importing and supplying highly qualified devices.

Techno House Inc. is a group of technicians derived from the technical development section of post-production.

We have been working as a distributor importing and providing reliable products while building systems to customers as a system integrator since the establishment.

### ● Performance Lighting Systems

Our experienced staff provide everything from planning and design to the construction and maintenance of performance lighting systems to meet the requirements of various applications.

## Creating a Visual Culture for the New Era with a Keen Eye on the Evolution of ICT Technology

NGC Corporation has been pursuing the possibilities of ICT-based video solutions since its establishment in 1985. We have earned the trust of our customers as “the best partner for digital innovation” by leveraging our long-standing experience and global network to provide cutting-edge products and technologies.

**NGC Corporation**  
<https://www.ngc.co.jp/>

### ● Broadcast System Integration (BSI) Business

Focusing on broadcasting station and post-production companies, we provide integrated services ranging from consulting on video editing equipment systems to studio design, system sales, and maintenance. Based on the technical know-how we have accumulated over the years, we contribute to the creation of an optimal environment for the future. In recent years, the need for data management and security measures has been increasing due to the dramatic increase in video data resulting from the development of AI, medical care, academic research, and the increase in surveillance cameras (and other factors). We have a proven track record of introducing backup solutions and ransomware prevention solutions based on the technical know-how we have accumulated over many years.

#### ● Products and Services

- Sales of video editing systems for broadcast stations/production companies (Autodesk, Quantum)
- Sales and support for 3D CG/Animation software (Maya, 3ds Max)
- Contracted development of meteorological/satellite data compilation, etc.
- Development, sales, and support of broadcast studio-cloakroom management systems for broadcasting stations
- Sales and support of business management systems for post-production
- Provision of training programs for CG and VFX users (NGC Training Center™)
- In-house development and sales of packaged software/hardware (RISINGC, ServerNEST, ATUM, Lavoro)

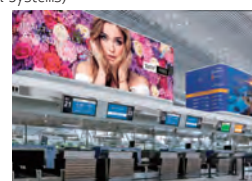

### ● Visual Solution Business

The primary distributor of Samsung Electronics LED & Displays. We propose and provide the world's best high-definition LED display, “THE WALL,” Samsung Electronics signage displays, and Samsung Electronics cloud signage services to Japanese customers. We also provide industrial projector systems and VR systems, and develop original applications to support the introduction of a wide range of video systems.

#### ● Products

- Samsung Electronics LED Display “THE WALL”
- Samsung Electronics signage displays
- Samsung Electronics cloud signage services
- Industrial projector systems (BARCO, Christie Digital Systems)
- Cutting-edge HMD systems (Varjo HMD systems)
- Original application MTCF

**Company Profile. ## Connecting People and Products through Electronics and Communications for a Cultured, Valued World.

With “connected hardware” at its core, Cerevo has introduced many connected products to the world. Cerevo is a fabless manufacturer that designs, develops, manufactures, and sells electronic products, leveraging its knowledge of IoT technology to create a wide range of products for various companies.

**Cerevo Inc.**  
<https://cerevo.com/>

### ●Live Streaming Equipment

Highly rated by professional users for stability, robustness, and ease-of-use, with an unparalleled cost-performance advantage.

#### Over 50,000 units sold in the series!

##### ●LiveShell W

The top-of-the-line model in a series of streaming equipment that continues to be selected around the world, featuring 2-screen switching functionality, 3-channel simultaneous streaming, and a streaming web application with a variety of effects.

#### Multi-angle live streaming with a higher level of performance

##### ●FlexTally Pro

A tally light system with one station and four lamps that connect to a switcher. The versatility of the system, which can be used with switchers from all major manufacturers, is an attractive feature.

### ●Smart Toys

Recreating items from anime and video games with utmost fidelity using consumer electronics technology.

#### Firearm-shaped smart toy with fans worldwide

##### ●DOMINATOR

This smart toy is a faithful reproduction from the original PSYCHO-PASS anime, including the automatic transformation mechanism and the function to measure the Crime Coefficient.

#### A 1/8 model of the Ghost in the Shell S.A.C. TACHIKOMA

##### ●Moving, Talking and Synchronizing TACHIKOMA 1/8 scale

In addition to a dialogue engine that allows for natural conversation, the system also features a “parallelization” function that allows other TACHIKOMA units to learn objects learned through image recognition via the Internet. The unit can also be driven with a smartphone.

**Winner of the Innovation Award three times at CES, the world's largest technology exhibition! Promoting contract development centered on hardware with internationally acclaimed technical capabilities**

##### ●Smart Microphone Listnr

Jointly developed with Panasonic Corporation. Its voice recognition system can analyze emotions from an infant's voice.

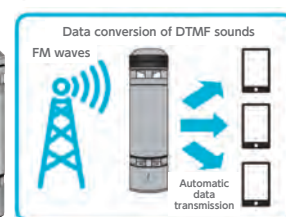

##### ●Line-switching Communication Device SIM CHANGER ▲

Jointly developed with NTT Docomo, Inc. The device utilizes portable SIM technology to switch up to four communication lines.

##### ●Wideband FM Radio Hint

Jointly developed with Nippon Broadcasting System, Inc. and Good Smile Company, Inc. The device is equipped with an omni-directional three-way speaker and Bluetooth speaker functions as well as the ability to transmit data.

**Company Profile. Optimize your space efficiency and enhance your immersive experience, maximizing our system services in high-quality sound and visual image.

Founded in 1960, Hibino Spacotech Corporation has provided innovation solutions in a wide range of fields including system engineering, sales promotion, and business support with professional audio and video equipments, based on our in-depth experience and reliable support & services.

## **HIBINO** Hibino Spacotech Corporation <https://www.hibino-spacotech.co.jp/>

### ● System business

Create one-of-a-kind premium system only for you

Through a lot prior discussion and review with you, all the system we service becomes to be the only one. Our expertise on acoustic and visual image can optimize your space efficiency and improve business environments.

### ● Space creation business

Provide comfortable "space direction solutions" by using sound and audio visual.

Combining together with lighting and contents our audio visual experience, technique and expertise ever built up through business since 1960, ensure we can offer one-stop services ranging from rental machinery and equipment, system engineering and field operation support. Meet customer's demands for which we shape the latest trend or added values with audio visual hardware system and application supported by advanced IT (Information Technology) and AI (Artificial Intelligence) technology.

### ● Sales promotion business

Enable you to realize unique sales promotion by way of many kinds of services

Support your sales promotion by planning and producing sound and visual image, ranging from music delivery making people feel good at stores, commercial production, to event operation. Offer you not only contents streaming services made on our own music delivery facility also but peripherals such as display, terminals or playback devices.

**Company Profile.** Corporate Name : Hibino Spacotech Corporation, Head Office Address : 2-7-70 Kaigan, Minato-ku, Tokyo 105-0022 Japan, Established : March 19 1960, Representative : Yasuhiro Katsumata, President, Business Lines : Selling and installation of professional acoustic and video equipment

## Design Digital Cinema System for the Ultimate Movie-going Experience. Fascinate People with Cutting-edge Movie Presentations.

Hibino Imagineering Corporation has been dedicated to cinema design and installation for more than 70 years. Our solution includes projecting vivid images, reproducing lifelike sound and streamlining operations within a reliable system.

# Creating Comfortable Environments for People and Society by Coordinating Various Sounds and Electromagnetic Waves to the Appropriate Situations

NIPPON ENVIRONMENT AMENITY CO., LTD. strives to create the ideal spaces for people and society, by controlling sound and electromagnetic waves. We employ a responsible construction system that integrates design, installation, and measurement, leveraging advanced skills obtained through our abundant practical experience.

Installation of soundproof panels at logistics warehouse (The top floor uses E-IX Advanced Improved Sound Reduction Panels)

**NIPPON ENVIRONMENT AMENITY CO., LTD.**

<https://nea-ltd.com/>

## Architectural Acoustics Solutions

We offer advanced vibration and sound insulation performance, creating ideal sound environments for theaters, television studios, large halls, etc. Our approach involves responsible construction that integrates design, installation, and sound measurement.

## Noise Suppression Solutions

We specialize in installing soundproof panels and silencers in commercial or industrial facilities and waste disposal centers. Our services encompass integrated noise control solutions, including surveys, design, product manufacturing, and installation.

## Electromagnetic Wave Shielding Solutions

Electromagnetic wave shielding is a technology used to shut out electromagnetic waves indoors and outdoors of building spaces, ensuring efficient radio wave usage and protection against TEMPEST (electromagnetic wave eavesdropping). We supply electromagnetic shielding technology to data centers, government facilities, testing facilities for equipment and technology, anechoic chambers, theaters, and television studios.

## Railway and Road Soundproofing Solutions

Our solutions aim to enhance the surrounding environment by reducing road traffic and railway noise. With extensive experience, we provide a diverse range of products, including advanced sound reduction devices.

## Experts to Solve the Needs Related to Various Sounds Featuring Unique Technologies and Experiences.

As an expert in “sound”, Nihon Onkyo Engineering solves the diverse needs of the customers through proposals, designs, production and the delivery of products and services.

NIHON ONKYO ENGINEERING

## Nihon Onkyo Engineering Co., Ltd.

<https://www.noel.co.jp/>

### Architectural Planning, Acoustic Design and Installation

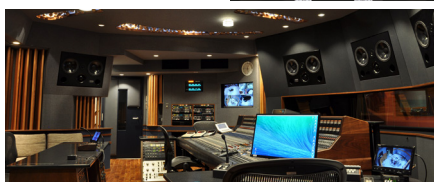

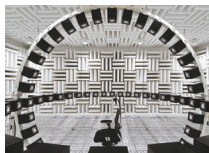

Nihon Onkyo Engineering is an expert specialized in acoustic design and interior finishing work of large and small spaces, with unique architectural acoustic technologies as a core competence.

The facilities for creative works such as broadcasting studios, recording studios, postproduction studios and halls, the research and experimental facilities of manufacturers such as anechoic rooms and reverberation rooms, and audio rooms and practice rooms for music players are provided.

Nihon Onkyo Engineering works as a fully-responsible contractor achieving acoustical requirements and specifications, the company is seamlessly in charge from planning and design to delivery.

The members have capabilities of design and project management including field operations, versatile experience and state-of-the-art technologies acquired through working as a fully-responsible contractor of acoustical requirements.

Nihon Onkyo Engineering has top class recognition and achievements in the Japanese architectural acoustic market.

### Consulting, Noise Improvement, Research and Development

Nihon Onkyo Engineering provides consulting services on sound and vibration based on the acoustic measurement technology developed in architectural acoustics. Invisible sounds and vibration are measured and analyzed as physical quantities. Moreover, wide-range of support is provided from surveys to mapping out of countermeasures, to improve environments through resolving acoustic problems caused by noise or vibration.

Nihon Onkyo Engineering is actively undertaking research and development activities as a motive power to create new values tuned to the changes in the needs. As facilities to propel this task, Acoustic Research Laboratory has been set up, equipped with anechoic rooms, large and small reverberation rooms, listening rooms, and the systems for measuring the parameters characterizing various acoustic materials. These facilities are used in contracted testing services as well.

Using NOE Asia Pacific Co. Ltd., established in Bangkok, Thailand, as a bridgehead of geographical expansion, global business realization is being promoted.

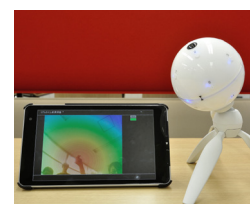

### System Products

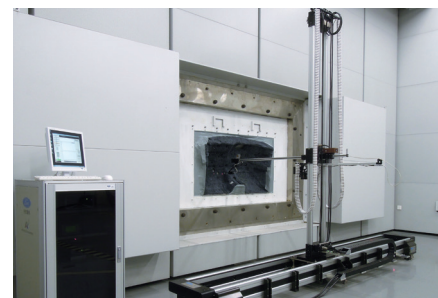

Using the core technologies of “visualization of sounds”, “simulation to predict acoustical characteristics and sound propagation”, and “identification of noise sources”, Nihon Onkyo Engineering develops and provides the system products such as measuring equipment and software to support customer's R&D activities including automotive and electric manufactures. Also we are providing the noise monitoring systems for aircraft noises.

Automatic measuring system for aircraft noise

Sound source probing and visualization system

System for evaluation of performances of automotive soundproof materials

**Company Profile.** **Corporate Name:** Nihon Onkyo Engineering Co., Ltd., **Head Office Address:** BR Ryogoku Building 2, 1-21-10 Midori, Sumida-ku, Tokyo 130-0021 Japan, **Established:** March 3 1972, **Representative:** Koichi Yamashita, President, **Business Lines:** ●Planning of architectural and acoustic work, acoustic design and installation management ●Contractor for architectural and acoustic work ●Noise improvements and consulting ●Development, selling and maintenance of acoustic facilities and measurement systems ●Leasing, operation and management of acoustic facilities and measurement systems ●Consultancy and contract research and development

As of June 2025

Armed with 40 years of experience and customer confidence, we can provide sound- and vibration-proofing technologies from downtown Tokyo to the world

Sanoh Corporation has more than 40 years of experience in planning, design, production, installation, and measurement for sound- and vibration-proofing, with a focus on noise reduction consultation services. During this time, we have seen great diversification in our product lines including sound insulation sheets, damping materials, underfloor air conditioning, and soundproofing canvas. We aim for further growth by developing our technologies and equipment to meet new market needs.

## SANOH CORPORATION

<https://sanoh-t.com/>

### We leverage our strengths to provide one-stop solutions from noise measurement to design and installation

The strength of Sanoh Corporation is our in-house system which covers upstream to downstream services including noise measurement, noise mitigation planning, design, installation, and data accumulation. Our soundproofing equipment and panels are uniquely manufactured in our factory, thus enabling us to respond to our customer requirements. With increasing demand for noise-free environment in the future, we will contribute to the society by enriching our know-hows and flexibly adjusting to new technological innovations.

### Consulting Services

We mainly provide sound measurement, countermeasure planning, and design services, essential for noise control. Data analysis based on detailed measurements enables us to propose flexible countermeasures to meet needs of our customers. SANOH has experts in design, production, and installation processes. We will continue to provide accurate consulting services while aiming to contribute to society.

### Services we can provide to address and help solve noise problems

#### Soundproofing Works

Sanoh Corporation has experience with more than 7,000 soundproofing projects. We have successfully solved noise problems in various locations, such as skyscrapers, plants, laboratories, hotels, educational institutions, public facilities, and apartment buildings.

#### Silencer

Sound is generated by vibrations in the air and travels at the speed of 340 meters per second. We absorb or deflect these vibrations with silencers by using damping materials and reflectors to increase soundproofing performance. Sanoh Corporation can propose silencers to meet the needs of various sites. This is one of the strength of our company.

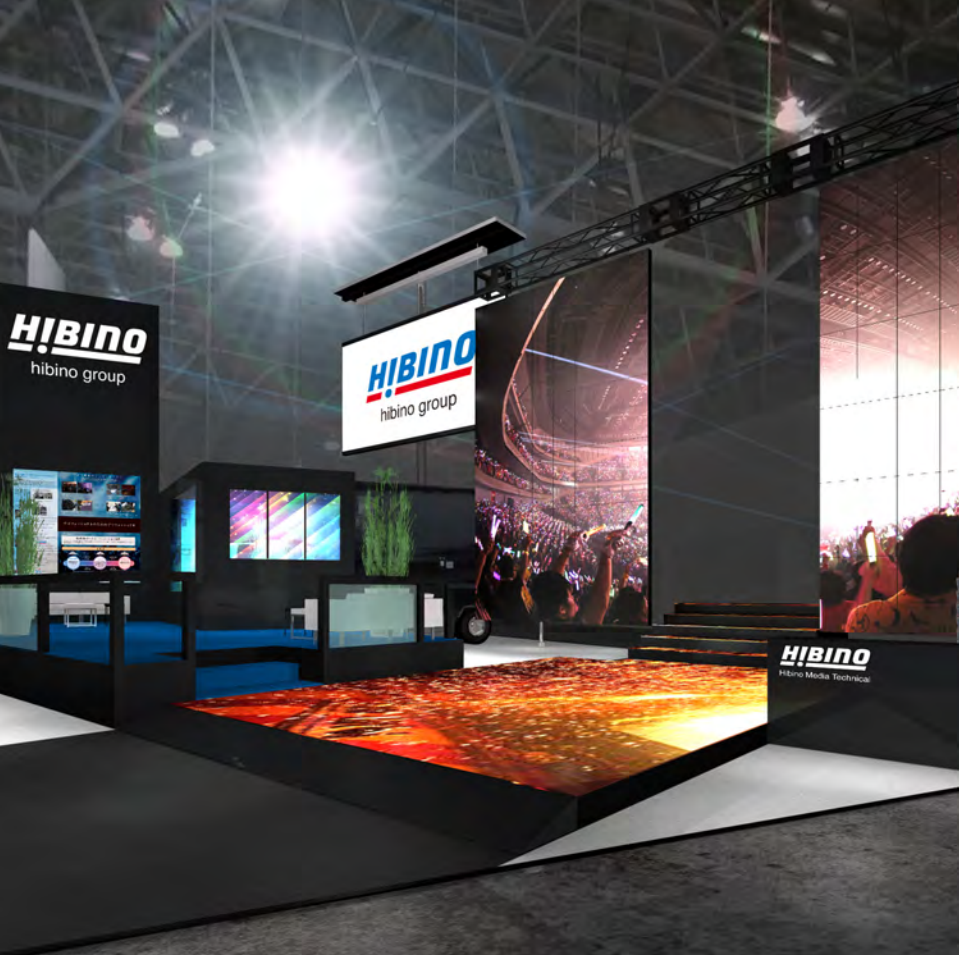

#### Noise Measurement and Calculation

Before embarking on soundproofing projects, we must measure noise sources and volumes. This is an extremely difficult task, but we have gone through as many as 15,000 cases of such measurement. Our experience and expertise accumulated over 40 years since the founding of our company testifies that we can perform professional noise measurement and calculation.

Demonstrating its experience and know-how in all MICE segments  
A total planner for providing “emotion” far exceeding customer requirements.

Hibino Media Technical has been providing high-level operational know-how to the event and convention organizers, centering on the rental business of image, acoustic and information technology (IT) equipment. The company is expanding its activity fields as a total planner providing services that satisfy customer requirements more than 100%.

## **HIBINO** Hibino Media Technical Corporation <https://www.media-t.co.jp/>

### ● Event and Convention Division

The division rents video, acoustic and other professional equipment, as well as personal computers and network systems. The division staff endowed with versatile experiences and competence propose optimal solutions tailored to specific requirements ranging from small meetings to large events.

### ● Produce Division

Four phases that are indispensable to organizing events, namely, planning, operation, direction and image production, are linked to one concept and are supported by a one-stop service. The division creates emotion exceeding the satisfaction of all segments of meetings, incentives, conventions and exhibitions (MICE).

### ● Job Market Division

The division supports career changes and personnel placement for creator personnel specialized in video, acoustics, websites, publishing and advertising. The division takes on the challenge of creating an employment service for the next generation through human solutions that link the needs of both employers and employees.

### ● Video production

### ● Audio

### ● Website and game design

### ● Design

### ● Publishing

### ● Advertising and events

### ● Medianix Osaka Division

The division is responsible for the Kansai market of Japan, specialized in renting, system proposal and dispatching operators for audio-video-IT equipment to medical academic meetings and MICE, as well as recording, editing and producing video footage. New event styles are proposed with infallible technology and free ideas.

We are  
video equipment  
coordinators.

Our job at Hibino Sigma Rise Corporation is to coordinate video equipment. What do customers want when they visit an event? We believe that they want to experience an extraordinary space. In order to achieve this, we support events via our expertise in the field of video.

**HIBINO** Hibino Sigma Rise Corporation  
<https://www.sigma-web.co.jp/>

● Visual System

In addition to the rental of video and acoustic equipment, we provide equipment coordination and operation services to meet the needs of individual events.

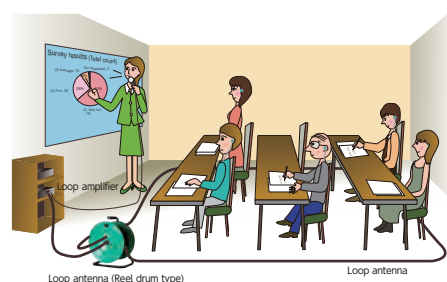

We have focused on large-scale video since our company was established, and have accumulated a wide range of expertise and equipment since that time.

Our strength is our ability to provide comprehensive solutions that cover everything from equipment coordination to large-scale video content for events.

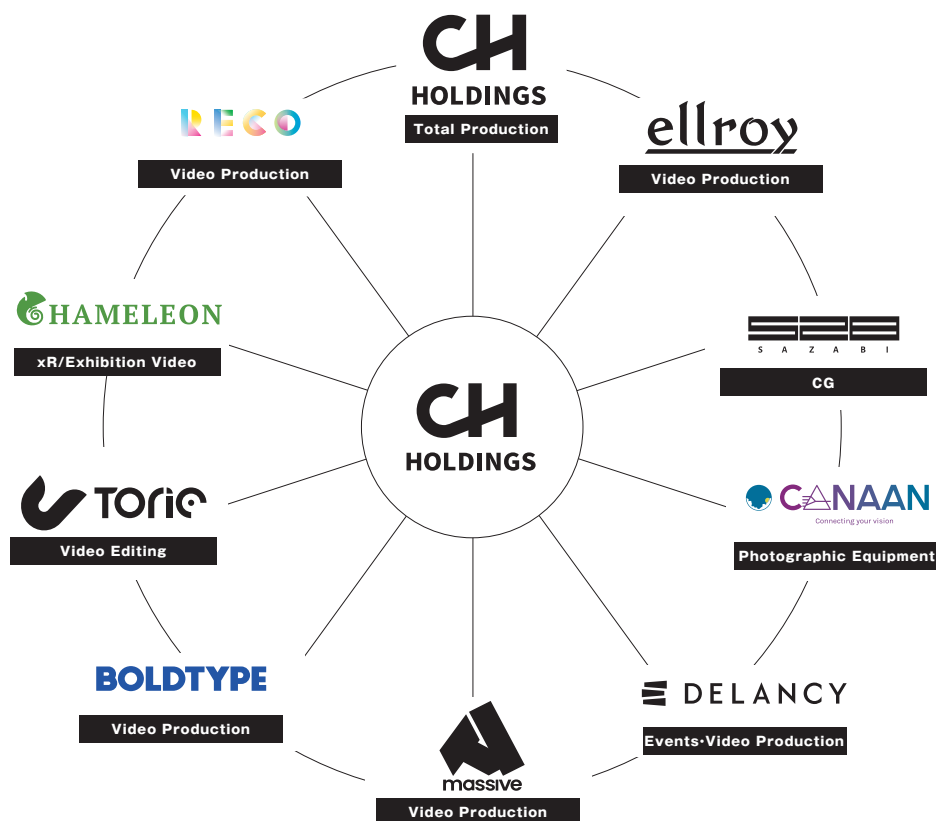

● Welfare Apparatus Sales

At the Welfare Apparatus Sales, we provide hearing loop systems to those that are hard of hearing or suffering from post-lingual deafness. Demand for the installation of hearing loop systems is increasing due to requirements for universal design in public spaces. Our systems help those hard of hearing and the elderly to fully participate in society without concern. Urban planning where everyone can hear is our way to ensure future happiness.

We offer comprehensive video production services, managing everything from planning to delivery.

CH Holdings is a creative conglomerate of 10 different companies specializing in video production. Each company employs professional personnel who combine their expertise to efficiently produce high-quality content.

## CH HOLDINGS Inc.

<https://the-ch.com/>

### ● A group of creatives with a high level of expertise

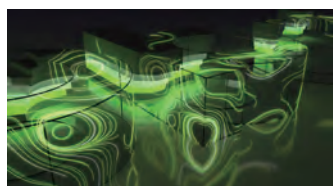

Companies in a variety of specialized fields collaborate to provide comprehensive visual solutions: production companies ellroy, Delancy, RECO, BOLDTYPE, and massive; CG/VFX production company SAZABI; editorial company Torie; advanced technology company CHAMELEON; photographic technology company Canaan; and others. We have an extensive track record in a wide range of fields, from our main work in TV commercials and web movies to websites and events. CH Holdings also functions as a startup platform, having launched numerous creative startups, thus contributing to the development of the production industry in Japan.

Example ▶ ellroy Inc.: TV commercial for Weathernews

Example ▶ RECO inc.: Opening sequence for the show "Aibo 22"

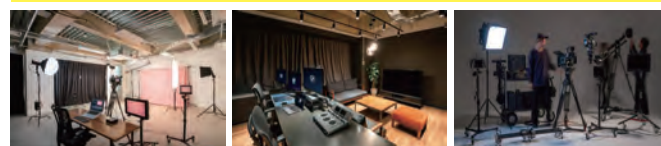

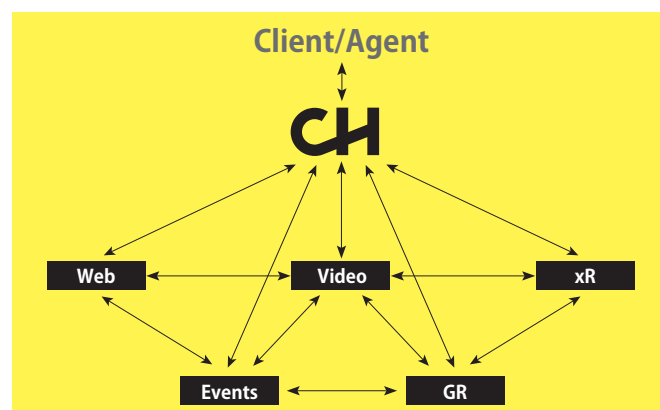

Example ▶ SAZABI Inc.: Globalway concept movie

### ● Comprehensive Production that Saves Time and Money

When you need multifaceted creative work done, including websites and videos, it is common to place orders with multiple companies. In contrast, at CH Holdings, the total production of creative work is centralized through ellroy, streamlining communication with the client who placed the order. We deliver the best creative output in the shortest time possible by leveraging the expertise of each group company.

The offices of each company in the CH Holdings Group are equipped with studios, editing rooms, and more. This creates an environment that enables flexible video production through sharing knowledge and skills.

**Company Profile.** Corporate Name : CH Holdings Inc., Head Office Address : ONEST Motoyoyogi Square 1F CH, 30-13, Motoyoyogi-cho, Shibuya-ku, Tokyo 151-0062 Japan, Established : September 1, 2014, Representative : Atsushi Wada, CEO, Business Lines : Management and supervision of subsidiaries involved in video production services

Our corporate philosophy is to “create energetic people,” and we design work-life spaces that make working fun.

Through the sale of high-performance work chairs and other office furniture, as well as design of office environments, we create entire spaces where every worker can work in a way that feels most natural to them. We thoroughly confront the challenges facing professionals to support their health and success, providing exciting experiences through better working environments.

## OFIX Ofix Co., Ltd.

<https://www.ofix.co.jp/>

### ●WORKAHOLIC

A work chair specialty store with concierges on hand to help customers create their ideal desk work environment

WORKAHOLIC is a high-performance work chair specialty store that boasts one of the best selections in Japan. Each customer is accompanied by a chair concierge who is not just knowledgeable about chairs, but deeply familiar with the structure and functions of the human body. These concierges provide support for everything from chair selection to creating the ideal desk work environment. They recommend the optimal chair for each customer's body type and work style, taking an objective approach that does not favor any particular manufacturer.

A two-hour per-session consulting service offered by highly experienced concierges.

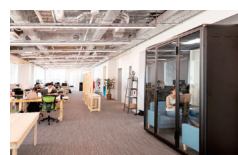

The name of the store reflects our brand's desire to “create environments that make working so much fun they could turn you into a workaholic”.

### ●Kolo

Private phone booths that enable new work styles

“I want a comfortable space where I can concentrate.” “I don't have any place to do web conferencing.” “I need somewhere for confidential conversations.” Kolo is a private, soundproof booth created by KOPLUS, an office furniture manufacturer from the Netherlands, designed to address such concerns. It has received high praise for its simple, elegant form, soundproofing that meets the highest standards in Japan, and convenient installation that requires no large-scale construction work.

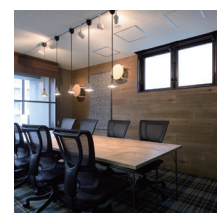

The lineup includes models for one to four people, all featuring double-layer glass.

### ●Office total service

We handle everything from design and construction to interior finishing, creating offices that make it fun to work.

As office environments evolve, we anticipate new trends and provide office spaces that match the work styles our customers seek. OFIX creates offices that embody the essence of fun and ease of work. Our designs depart from the traditional “island layout” to offer greater flexibility, utilize natural materials that convey a sense of warmth, and incorporate office furniture specifically designed with workers' health in mind.

We leverage expertise in office furniture selection and space design to provide comprehensive services that create ideal work environments.

## Providing a Space for Entertainment, Sharing the Joy and Excitement of Music

By operating live music venues and music studios, Hibino Entertainment Corporation aims to provide comfortable spaces where people can experience the joy of music.

### Hibino Entertainment Corporation

<https://www.hibino-entertainment.co.jp/>

#### ● REAL DIVA'S

REAL DIVA'S is a live music venue operated by the Hibino Group. Based on the concept of "a classy bar where those with similar interests can meet for great music", we offer lively performances by talented artists across a wide range of genres—from Jazz and Soul to R&B and Pop.

We provide our customers with delicious food and drinks, high quality service, and exceptional live music to ensure a comfortable and enjoyable experience. Additionally, we offer live streaming services to interactively connect listeners and performers through the network. Our efforts include enhancing immediacy and implementing commerce centered around intangible concepts online.

We consider each opportunity to serve you as a once-in-a-lifetime opportunity, and we are dedicated to making it happen.

#### ● "bumblebee studio" Rehearsal Studio

"bumblebee studio" is a music rehearsal studio catering to everyone from beginners to professionals. With seven rehearsal and recording rooms featuring high ceilings and excellent acoustic environments, playing a musical instrument becomes even more enjoyable. We also offer filming and distribution services, allowing you to broadcast your band's sound with high volume. Our "Quick and Easy" series simplifies the process, perfect for beginners, offering affordable "Quick and Easy Filming," "Quick and Easy Broadcasting," and "Quick and Easy Recording." Another highlight is our collection of rental instruments, including vintage guitars and British drums. We are committed to supporting your musical endeavors with comprehensive facilities and services.
